

April 12, 2011

Stacey,

Now that our home is complete and Barb and I have moved in, I thought it was a good time to thank you for your efforts and the care you showed in the construction of our house. I especially appreciated your dedication in making the house energy efficient and in insuring that it was constructed with quality materials and quality workmanship. As an engineer and an experienced home remodeler myself I understand the many complexities of building a custom home and through it all you answered all my questions, accommodated my requests, and quickly remedied problems as they arose. Since we were building our home on our son's property adjacent to his home there were special issues that needed to be addressed. You provided input to all these issues and found solutions that that resulted in a beautiful and cohesive design. The use materials and design elements on our new house that were the same or similar to those used in our son's existing home was key in obtaining a cohesive and seamless design. The use of a covered breezeway and gazebo between the homes enhanced the great look that was achieved. Everybody who visits remarks on the beauty of our "compound".

Finally, I appreciated your flexibility in allowing me complete the interior trim myself and adapt the schedule accordingly. I am not sure many builders would put up with that added complexity. Please feel free to contact us if you want to show our home to others.

Thanks,

Rich Hock and Barb Johnson
